ACTIVITIES OF OCTOBER 2015

After successful e-Learning'15 conference and also workshop sessions for workpackages in Berlin on 11-12 September 2015, the leaders and co-leaders of WP3 and WP4 published first versions of final of versions of European Strategic Framework for Computing Education and Training 2020 (ESFCET 2020-v1.1) and European Evaluation Framework for Computing Education and Training 2020 (EEFCET 2020 v1.1).

The vision of ESFCET 2020 is to facilitate smart, adapted, innovative, competitive and inclusive education and training of ICT specialists which is based on strong knowledge alliances between Universities, Research, Industry and Enterprises to allow for co-creation and flow of Knowledge, promote lifelong learning and to meet ICT-needs and trends of the global and regional European ICT work markets and the demands of the future society..

EEFCET 2020 does not only allow the evaluation of the quality of curricula and syllabi, but also the organisation and management of the introduction and implementation of curricula and syllabi; as well as processes for their update in a reflective and timely manner; and systems established for their evaluation and update.
